WORK EXPERIENCE

Junior Software Engineer

Peerbits

04/2024 - Present

Ahmedabad, India

Achievements/Tasks

- Developed and maintained web applications using Vue js and Laravel, improving performance by 20%.
- Implemented RESTful APIs in PHP and Laravel to facilitate data exchange between client and server.
- Collaborated with product managers and designers to create user-friendly interfaces and features.

Junior Backend Developer

Dynamic Dreamz

06/2021 - 03/2024

Surat, India

Achievements/Tasks

- **API Development and Maintenance:** Designed and implemented scalable RESTful APIs using PHP and Laravel, facilitating efficient client-server communication.
- **Database Management:** Optimized MySQL queries, improving data retrieval performance by 15% and enhancing overall database efficiency.
- **Performance Optimization:** Implemented caching strategies and optimized backend processes, reducing server load by 10% and improving response times.
- **Security Enhancements:** Developed and implemented security measures such as OAuth2 and Sanctum and Passport authentication to ensure secure data transactions.

EDUCATION

Bachelor of computer applications

Veer Narmad South Gujarat

07/2018 - 05/2021

Surat, Gujarat

Web Development

- Created a tuition management system with Laravel, showcasing proficiency in web development and comprehensive utilization of the framework's features.
- YGPA - 7.

12th - GSEB

High school

07/2017 - 04/2018

Surat, India

Commerce

- Percentage - 60%

SKILLS

PHP

Laravel

Vue Js

Pinia

Tailwind

Java Script

Html

Css

Mysql

Git

Github

Node JS

Bootstrap

Jquery

Ajax

PROJECTS

Altamario one (Online streaming platform)

- Identify and resolved several bugs related to video playback issues, improving the overall user experience.
- Implement reusable components and manage state effectively to streamline development and enhance performance.
- Collaborating with other team members and client to build and maintain RESTful APIs using Laravel to support front-end operations and integrate with third-party services.

Toodles (payar technology)

- Integrated Network Payment Gateway for seamless third-party payment processing.
- Designed and developed user authentication APIs for both the web application and Flutter app, ensuring secure access and data protection.
- Maintained merchant portal APIs for efficient order and inventory management, along with an Admin portal for centralized control of users, merchants, orders, and system configurations.
- Managed database modifications, ensuring data consistency, security, and seamless integration with new platform features.

Dynamic PayHide(Shopify-App)

- Develop and maintain the Dynamic PayHide Shopify app using Shopify's APIs and custom app extensions.
- Implement special payment options for wholesale customers, allowing merchants to offer customized payment methods based on customer tiers or order values.
- Design and develop back-end services using Laravel, managing app logic, user authentication, and data processing.

CWRB - Chicks who ride bike (Flutter App API)

- Designed and built a robust Laravel-based API to handle user authentication, profile management, event registration, and social features such as group creation and ride scheduling.
- Enhanced API performance by implementing query optimization, caching strategies, and reducing payload sizes for faster response times, ensuring seamless user experiences across devices.
